

APPENDIX B

Stormwater Questionnaires

City of Wilton Manors Public Drainage Survey

(Please complete a separate form for each problem area and provide as much information as possible)

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other _____

2. Where is the problem located? Please indicate an address or intersection:

Water pools and floods in Cul de Sac in Front of 2117 NE 17th Terrace.

3. Approximately how long has the problem existed? 4-5 years and getting worse

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? Heavy Rainfall

On average, how often does the area flood? Whenever there is Heavy rainfall

On average, how deep is the flooding? 2 feet give or take.

On average, how long does it take for the floodwater to go away? One Full day

What is the worst flood you have seen in this area? About 3-4 feet

Approximately when did the worst flood occur? Last year

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

Blockage in the only sewer serving the Cul de Sac and surrounding area.

8. Additional Comments:

Glad to see that someone is finally doing something about it. It gets difficult to get in and out when this happens.

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

(Please complete a separate form for each problem area and provide as much information as possible)
Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:
6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

- What type of problem have you observed? (check all that apply)
 flooding potholes damaged gutters/drains/manholes other _____
- Where is the problem located? Please indicate an address or intersection:
 501 NE 23 ST N.E. INTERSECTION OF NE 26TH ST + NE 9TH AVE
 519 NE 23 ST WILTON DRIVE AT NE 6TH AVE.
- Approximately how long has the problem existed? 9 YEARS TO 3 MONTHS (WILTON DRIVE)
- Has the problem gotten any worse over time? Yes No
- The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:
 Does it take a large storm to flood the area? 30 MINUTES
 On average, how often does the area flood? EVERY RAIN FALL
 On average, how deep is the flooding? 3-6 INCHES
 On average, how long does it take for the floodwater to go away? 6-9 HOURS
 What is the worst flood you have seen in this area? MULTIPLE DAYS OF RAIN
 Approximately when did the worst flood occur? LAST SUMMER RAINY SEASON
- Is there any trash left behind when the floodwaters are gone? Yes No
- Do you have any ideas about what may be causing the problem? Please explain below:
LACK OF PROPER STORM DRAIN + SWALE NOT GRADED OR PAVED
- Additional Comments:
- Do you have any photos of the problem? (Please email photos to the address above) Yes No

City of Wilton Manors Public Drainage Survey

(Please complete a separate form for each problem area and provide as much information as possible)

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other No drains

2. Where is the problem located? Please indicate an address or intersection:

1416 NE 24th St. Wilton Manors- all the way East to NE 15th St. (on S. side of 24th St.)

3. Approximately how long has the problem existed? Since 5 high elev. bldg's were built-to West

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? NO. Every house floods front/back yards.

On average, how often does the area flood? Every 1/2 hour rainstorm!

On average, how deep is the flooding? 1 to 3 ft

On average, how long does it take for the floodwatersto go away? Many hours-to days (Hurr

What is the worst flood you have seen in this area? Hurr. Andrew, Wilma, Irma & every rainstorm!

Approximately when did the worst flood occur? Same as above

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

There is NO drainage system in street/no retaining walls on high elev. prop's. to West/Southwest of 1416 NE 24th St. All flood waters flow from 1408 then- East & downhill to NE 15th Street.

8. Additional Comments:

This truly is an emergency problem and these are the original Cottages on the 1st paved street in W. M. These homes are being refurbished/preserved. We do not want them under water to visit them in the future. It is up to you and I to plan for tomorrow and in our future! Please please help with our dire flooding prob.
THANK YOU SO SO MUCH!!!!

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

(Please complete a separate form for each problem area and provide as much information as possible)

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other _____

2. Where is the problem located? Please indicate an address or intersection:

water coming up from street drains: 16h Ave and 28th Drive NE, and intersection of 14th Ave and 15th Ave NE

3. Approximately how long has the problem existed? 2 years, during high tide and heavy rains

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? no, moderate rain

On average, how often does the area flood? 1/month

On average, how deep is the flooding? 6-8 inches

On average, how long does it take for the floodwater to go away? 1 day

What is the worst flood you have seen in this area? 8 inches

Approximately when did the worst flood occur? fall, high tides

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

the water comes up from the storm drains which are connected to the river, so the river is so high that it cannot accommodate the storm run off

8. Additional Comments:

I have seen the level of the river rise since I lived at my address over the last 5 years. First the water came over the sea wall about 1/2 inch in October during king tide for a few days. Now it comes over the sea wall 6-8 inches deep and about 3-4 feet from the water edge of the sea wall most of October and intermittent during the winter months usually during high tide. Also during heavy rains in combination with high tide.

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

(Please complete a separate form for each problem area and provide as much information as possible)

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other sewage overflow

8 JUN 2017

2. Where is the problem located? Please indicate an address or intersection:

1 FO 99 Almar Drive, Sewer manhole overflows into storm drain

3. Approximately how long has the problem existed? since hurricane Irma + before

4. Has the problem gotten any worse over time? Yes No unknown

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? YES, i.e. Hurricane Irma or 4+ inch rain fall

On average, how often does the area flood? 2x/year

On average, how deep is the flooding? almost to crown of road

On average, how long does it take for the floodwater to go away? 2 days

What is the worst flood you have seen in this area? Hurricane Irma, almost covered street

Approximately when did the worst flood occur? Hurricane Irma

6. Is there any trash left behind when the floodwaters are gone? Yes No sewage overflow from manhole

7. Do you have any ideas about what may be causing the problem? Please explain below:

The storm drain in front of my house has a very small outlet pipe (< 6") and doesn't drain

8. Additional Comments:

During + After hurricane Irma, the water level in the street side was higher than the Middle River

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other SEWER BACKUP

2. Where is the problem located? Please indicate an address or intersection:

FRONT OF 99 ALMAR DRIVE

3. Approximately how long has the problem existed? + 5 YEARS

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? EVERY STORM / HURRICANE

On average, how often does the area flood? ONCE A YEAR OR MORE

On average, how deep is the flooding? COUPLE OF INCHES

On average, how long does it take for the floodwater to go away? HOURS / DAYS

What is the worst flood you have seen in this area? YES

Approximately when did the worst flood occur? DURING / AFTER THE STORM

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

DRAIN CANNOT HANDLE QUANTITY OF WATER.
GROUND CANNOT ABSORB ADDITIONAL WATER.
SEWER OVERFLOWS AND MIXES WITH STORM WATER

8. Additional Comments:

RAW SEWAGE MIXED WITH STORM WATER
IS A MAJOR HEALTH HAZZARD.

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

Neighborhood Association: CANA

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other _____

2. Where is the problem located? Please indicate an address or intersection:

In front of 2733 NE 16th Avenue - Whenever there is heavy rain the drains are not able to keep up and the water

3. Approximately how long has the problem existed? At least 10 years...the entire time we have live

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? Yes but if a moderate to heavy rain lasts over 30 minut

On average, how often does the area flood? Can't count...it hapens multiple times during rainy seas

On average, how deep is the flooding? At least one foot on the road...tapers down as it spills into dri

On average, how long does it take for the floodwatersto go away? Depending on depth, 30-90

What is the worst flood you have seen in this area? Five years ago (?) in October we had a major f

Approximately when did the worst flood occur? Five Octobers ago (2014?)

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

Storm drains can't handle the volume and during high tide (especially during King Tides) the river backs up thru the drains onto the street so there is no where for the water to go other than to flood.

8. Additional Comments:

Problem is better since the road was redone and sidewalks installed but the problem persists during heavy rains.

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

Neighborhood Association: East

Name:

Address:

Phone:

Email:

City of Wilton Manors Public Drainage Survey

(Please complete a separate form for each problem area and provide as much information as possible)

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other ponding

2. Where is the problem located? Please indicate an address or intersection:

In front of 2017 N. Dixie Highway -- just off of Dixie Highway

3. Approximately how long has the problem existed? ten years that I've lived here

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? yes

On average, how often does the area flood? any very heavy rain -- seasonal variations

On average, how deep is the flooding? 1 - 4 inches

On average, how long does it take for the floodwater to go away? 1/2 day to 1 day

What is the worst flood you have seen in this area? covering the entire entrance to my parking area

Approximately when did the worst flood occur? not sure

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

About two or three years ago the sidewalk along Dixie was replaced and raised, causing a depression where the flooding now occurs. Also, there is a storm drain directly where the flooding occurs, so I suspect the drain is clogged.

8. Additional Comments:

I'm very annoyed that I took the time to complete this form only to discover it would not go via e mail so that I now have to print, stamp, and address it. It doesn't inspire confidence that this "survey" is ever going to result in anything.

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other _____

2. Where is the problem located? Please indicate an address or intersection:

northeast corner of ne 2 ave and ne 26 drive

3. Approximately how long has the problem existed? at least 8 years

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? no not a large storm, but at least a significant oneeas

On average, how often does the area flood? each bad rain

On average, how deep is the flooding? 2-3 nches

On average, how long does it take for the floodwatersto go away? several horslast year whebr

What is the worst flood you have seen in this area? last year when it rained for 2 days heavily

Approximately when did the worst flood occur? i think june

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

i think thw storm drain needs to be cleaned

8. Additional Comments:

9. Do you have any photos of the problem? (Please email photos to the address above) Yes No

Email:

City of Wilton Manors Public Drainage Survey

(Please complete a separate form for each problem area and provide as much information as possible)

Email completed forms to WMSurveys@Baxterwoodman.com or mail survey to:

6600 N. Andrews Ave. #100, Ft. Lauderdale, FL 33309

1. What type of problem have you observed? (check all that apply)

flooding potholes damaged gutters/drains/manholes other drains to river

2. Where is the problem located? Please indicate an address or intersection:

2845 NE 17 Avenue

3. Approximately how long has the problem existed? years

4. Has the problem gotten any worse over time? Yes No

5. The extent of flooding depends on the amount of rain that occurs. Please answer to the best of your ability the following questions concerning the amount of flooding:

Does it take a large storm to flood the area? Yes

On average, how often does the area flood? it floods

On average, how deep is the flooding? 6" to 9"

On average, how long does it take for the floodwater to go away? Until the tide goes down.

What is the worst flood you have seen in this area? Hurricane Irma

Approximately when did the worst flood occur? Hurricane hit at high tide

6. Is there any trash left behind when the floodwaters are gone? Yes No

7. Do you have any ideas about what may be causing the problem? Please explain below:

There needs to be flappers on the storm drains where they drain into the N. Fork of the Middle River. Where there are heavy rains at high tide the river flows up the drains into the streets. This is also very common at the corner of NE 16 Ave and NE 28 Drive.

8. Additional Comments:
