Wilton Manors, FL 33305

**Re: City of Wilton Manors General Employees' & Police Officers' Retirement Plan
GASB No. 67 Disclosure Information for Fiscal Year Ending September 30, 2018**

Dear Board Members:

As requested, we have prepared the updated actuarial disclosure information required under Governmental Accounting Standards Board (GASB) Statement No. 67 for the fiscal year ending September 30, 2018.

The following exhibits were based upon financial information as of September 30, 2018, which was provided by the auditor, as well as information furnished by the Plan Administrator. If any of this information changes during the auditing process (including benefit payments, contributions, administrative expenses, or the actual market value of assets as of September 30, 2018), then the following exhibits will need to be revised:

- Statement of Changes in Net Pension Liability and Ratios
- Schedule of Net Pension Liability
- Schedule of Contributions
- Sensitivity of Net Pension Liability to the Single Discount Rate Assumption

The actuarial valuation of the liabilities has been determined as of the beginning of the year, October 1, 2017 (based on the actuarial valuation results as reported in the October 1, 2017 Actuarial Valuation Report dated June 4, 2018), and "rolled forward" to the September 30, 2018 measurement date. Using the beginning of the year valuation of liabilities allows for timely reporting at the end of the year. If significant changes occur during the year, such as benefit changes or changes in assumptions or methods, these may need to be reflected in the process. Please refer to our October 1, 2017 actuarial valuation report for information related to participant data, economic and demographic assumptions, and benefit provisions.

Please note that there are other items not listed above that will be required in the Plan's financial statements and/or the City's Comprehensive Annual Financial Report (CAFR) to fully comply with GASB No. 67 standards. This additional information will need to be provided by the Plans' investment consultants, accountants or other financial statement preparers.

Disclosures

This information is intended to assist in preparation of the financial statements of the Plan.

Financial statements are the responsibility of management, subject to the auditor's review. Please let us know if the auditor recommends any changes.

Our actuarial calculations for this report were prepared for the purpose of complying with the requirements of GASB Statement No. 67. These calculations have been made on a basis that is consistent with our understanding of this Statement.

Our calculation of the liability associated with the benefits described in this report was performed for the purpose of satisfying the requirements of GASB Statement No 67. The Net Pension Liability is not an appropriate measure for measuring the sufficiency of plan assets to cover the estimate cost of settling the employer's benefit obligation. The Net Pension Liability is not an appropriate measure for assessing the need for or amount of future employer contributions. A calculation of the plan's liability for purposes other than satisfying the requirements of GASB Statement No. 67 may produce significantly different results.

This report was prepared at the request of the Board and is intended for financial reporting purposes for use by the Retirement Plan and those designated or approved by the Board. This report may be provided to parties other than the Retirement Plan only in its entirety and only with permission of the Board. This report should not be relied on for any purpose other than the purpose described above. GRS is not responsible for unauthorized use of this report.

The calculations in this report are based on financial information as of September 30, 2018 furnished by the Plan's Auditor as well as the assumptions, methods, and plan provisions outlined in our October 1, 2017 Actuarial Valuation Report dated June 4, 2018.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To best of our knowledge, the information contained in this letter is accurate and fairly presents the actuarial position of the plan as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standard Board, and with applicable statutes.

Theora Braccialarghe and Melissa Moskowitz are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. The signing actuaries are independent of the plan sponsor.

Respectfully submitted,

GABRIEL, ROEDER, SMITH AND COMPANY

Theora P. Braccialarghe, FSA, MAAA
Senior Consultant & Actuary

Melissa R. Moskowitz, EA, MAAA

2014	35,406,099	25,648,327	9,757,772	72.44%	554,092	1761.04%

**Covered payroll for the fiscal year is estimated from the actual member contributions to the plan for the same period. This amount should be updated to actual Covered Payroll (as defined in GASB No. 67) for the fiscal year, if needed.*

NOTES TO SCHEDULE OF NET PENSION LIABILITY
GASB Statement No. 67

Valuation Date: October 1, 2017
Measurement Date: September 30, 2018

Methods and Assumptions Used to Determine Net Pension Liability:

Actuarial Cost Method	Entry Age Normal
Salary Increases	5.50%
Investment Rate of Return	7.00%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition
Mortality	RP-2000 mortality tables with collar adjustments and generational projections using scale BB as used by the Florida Retirement System for the Regular Class members (General Employees) and Special Risk Class members (Police Officers) in the July 1, 2017 actuarial valuation.

Other Information:

Notes See Discussion of Valuation Results beginning on page 1 of the October 1, 2017 Actuarial Valuation Report dated June 4, 2018.

SCHEDULE OF CONTRIBUTIONS
GASB Statement No. 67

FY Ending Sept. 30	Actuarially Determined Contribution	Actual Contribution	Contribution Deficiency (Excess)	Covered Payroll*	Actual Contribution as a % of Covered Payroll
2018	\$ 1,667,049	\$ 1,667,049	\$ -	\$ 523,862	318.22%
2017	1,685,242	1,685,242	-	604,422	278.82%
2016	1,638,492	1,638,492	-	595,805	275.00%
2015	1,674,023	1,676,869	(2,846)	600,852	279.08%
2014	1,645,738	1,645,738	-	554,092	297.02%

**Covered payroll for the fiscal year is estimated from the actual member contributions to the plan for the same period. This amount should be updated to actual Covered Payroll (as defined in GASB No. 67) for the fiscal year, if needed.*

NOTES TO SCHEDULE OF CONTRIBUTIONS
GASB Statement No. 67

Valuation Date: October 1, 2017
Notes Actuarially determined contribution rates are calculated as of the October 1 which is one year prior to the end of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar, Closed
Remaining Amortization Period	13 years
Asset Valuation Method	5-year smoothed market
Salary Increases	5.5%
Investment Rate of Return	7.00%
Annual cost-of-living adjustment for eligible retirees	3.0%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition
Mortality	RP-2000 mortality tables with collar adjustments and generational projections using scale BB as used by the Florida Retirement System for the Regular Class members (General Employees) and Special Risk Class members (Police Officers) in the July 1, 2017 actuarial

Other Information:
Notes See Discussion of Valuation Results beginning on page 1 of the October 1, 2017 Actuarial Valuation Report dated June 4, 2018.

**SENSITIVITY OF NET PENSION LIABILITY TO THE SINGLE DISCOUNT RATE
ASSUMPTION
GASB Statement No. 67**

A single discount rate of 7.00% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.00%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between the total actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (7.00%) was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.00%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption

1% Decrease 6.00%	Current Single Discount Rate Assumption 7.00%	1% Increase 8.00%
\$15,330,623	\$11,086,463	\$7,559,157
