2020 Wilton Drive
Wilton Manors, FL 33305

**Re: City of Wilton Manors Volunteer Firefighters' Retirement System
GASB No. 68 Disclosure Information for Reporting Year Ending September 30, 2020**

Dear Board Members:

As requested, we have prepared the actuarial disclosure information required under Governmental Accounting Standards Board (GASB) Statement Number 68 for the City of Wilton Manors Volunteer Firefighters' Retirement System for use in the preparation of the City's GAAP-basis employer financial statement for the reporting year ending September 30, 2020.

GASB Statement No. 68 establishes the accounting and financial reporting standards for state and local government employers who provide their employees (including former employees) pension benefits through a trust. These calculations have been made on a basis that is consistent with our understanding of this accounting standard. Enclosed are the following exhibits:

- Executive Summary
- Schedule of Changes in Net Pension Liability and Related Ratios for Measurement Year
- Notes to Net Pension Liability
- Pension Expense Under GASB No. 68
- Statement of Outflows and Inflows Arising from Current Reporting Period
- Statement of Outflows and Inflows Arising from Current and Prior Reporting Periods
- Summary of Remaining Deferred Outflows and Inflows of Resources
- Schedule of Contributions
- Notes to Schedule of Contributions
- Sensitivity of Net Pension Liability to the Single Discount Rate Assumption

The actuarial valuation of the liabilities was determined as of the beginning of the year, October 1, 2018 (based on the actuarial valuation results as reported in the October 1, 2018 actuarial valuation report dated June 4, 2019) and rolled forward to the September 30, 2019 measurement date. These liabilities are used for GASB Statement No. 68 reporting for the reporting period ending September 30, 2020. Using a measurement date of September 30, 2019 allows for timely reporting at the end of the year. If significant changes occur during the year, such as benefit changes or changes in assumptions or methods, these should be noted in the footnotes.

Required Disclosures

This information is intended to assist in preparation of the financial statements of the Plan. Financial statements are the responsibility of management, subject to the auditor's review. Please let us know if the auditor recommends any changes.

Our actuarial calculations for this report were prepared for the purpose of complying with the requirements of GASB Statement No. 68. These calculations have been made on a basis that is consistent with our understanding of this Statement.

The Net Pension Liability is not an appropriate measure for measuring the sufficiency of plan assets to cover the estimated cost of settling the employer's benefit obligation. The Net Pension Liability is not an appropriate measure for assessing the need for or amount of future employer contributions. A calculation of the plan's liability for purposes other than satisfying the requirements of GASB Statement No. 68 may produce significantly different results. This report may be provided to parties other than the City or Board only in its entirety and only with the permission of the City or Board. GRS is not responsible for unauthorized use of this report.

This report is based upon information, furnished to us by the Board, concerning Plan benefits, active members, deferred vested members, retirees and beneficiaries, and financial data. This information was checked for internal consistency, but it was not audited. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator.

This report complements the actuarial valuation report that was provided to the Board and should be considered in conjunction with that report. Please see the actuarial valuation report as of October 1, 2018 dated June 4, 2019 and the GASB No. 67 report dated July 15, 2020 for additional discussion of the nature of actuarial calculations and information related to participant data, economic and demographic assumptions, and benefit provisions.

The findings in this report are based on data through September 30, 2018 and financial information through September 30, 2019. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

To the best of our knowledge, the information contained with this report is accurate and fairly represents the actuarial position of the Plan. All calculations have been made in conformity with generally accepted actuarial principles and practices as well as with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

The signing actuaries are independent of the plan sponsor.

Theora Braccialarghe and Melissa Moskovitz are members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

NOTE: The Plan is not pay based, as the members are volunteer firefighters

NOTES TO NET PENSION LIABILITY
GASB Statement No. 68

Significant Assumptions and Methods used to Measure the Net Pension Liability

The Total Pension Liability was determined by the actuarial valuation as of October 1, 2018, using the following actuarial assumptions and methods, applied to all periods included in the measurement:

Actuarial Cost Method	Entry Age Normal
Salary Increases	N/A. This Plan is not pay based
Investment Rate of Return	6%, net of investment expenses
COLA	None
Retirement Age	100% retirement one half year after reaching age 55 or age 50 with 20 years of service
Mortality	RP-2000 mortality tables with blue collar adjustments and generational projections using scale BB as used by the Florida Retirement System for the Special Risk Class members in the July 1, 2017 actuarial valuation.

Standard actuarial update procedures were used to “roll forward” the Total Pension Liability to September 30, 2019, the Plan’s fiscal year end.

Other Information

See Discussion of Valuation Results on page 1 of the October 1, 2018 Report dated June 4, 2019.

PENSION EXPENSE
FISCAL YEAR ENDED SEPTEMBER 30, 2020
BASED ON MEASUREMENT PERIOD ENDING SEPTEMBER 30, 2019
GASB Statement No. 68

Pension Expense

1. Service Cost	\$ 3,552
2. Interest on the Total Pension Liability	98,032
3. Current-Period Benefit Changes	-
4. Employee Contributions (made negative for addition here)	-
5. Projected Earnings on Plan Investments (made negative for addition here)	(105,359)
6. Pension Plan Administrative Expense	41,063
7. Other Changes in Plan Fiduciary Net Position	-
8. Other Changes in Total Pension Liability (Change in State Contribution Reserve)	11,936
9. Recognition of Outflow (Inflow) of Resources due to Liabilities	(5,758)
10. Recognition of Outflow (Inflow) of Resources due to Assets	2,909
11. Total Pension Expense	<u>\$ 46,375</u>

**STATEMENT OF OUTFLOWS AND INFLOWS
ARISING FROM CURRENT REPORTING PERIOD
EMPLOYER FISCAL YEAR ENDED SEPTEMBER 30, 2020
BASED ON MEASUREMENT PERIOD ENDING SEPTEMBER 30, 2019
GASB Statement No. 68**

A. Outflows (Inflows) of Resources due to Liabilities

1. Difference between expected and actual experience of the Total Pension Liability due to (gains) or losses	\$ (5,758)
2. Assumption Changes (gains) or losses	-
3. Recognition period for Liabilities: Average of the expected remaining service lives of all employees {in years}	1.0
4. Outflow (Inflow) of Resources to be recognized in the current pension expense for the difference between expected and actual of the Total Pension Liability	(5,758)
5. Outflow (Inflow) of Resources to be recognized in the current pension expense for assumption changes	<u>-</u>
6. Outflow (Inflow) of Resources to be recognized in the current pension expense due to Liabilities	(5,758)
7. Deferred Outflow (Inflow) of Resources to be recognized in future the difference between expected and actual experience of the Total Pension Liability	-
8. Deferred Outflow (Inflow) of Resources to be recognized in future pension expenses for assumption changes	<u>-</u>
9. Deferred Outflow (Inflow) of Resources to be recognized in future pension expenses due to Liabilities	-

B. Outflows (Inflows) of Resources due to Assets

1. Net difference between projected and actual earnings on pension plan investments due to (gains) or losses	\$ 11,771
2. Recognition period for Assets {in years}	5.0
3. Outflow (Inflow) of Resources to be recognized in the current pension expense due to Assets	2,354
4. Deferred Outflow (Inflow) of Resources to be recognized in future pension expenses due to Assets	9,417

C. Outflow of Resources due to Employer Contribution

1. Deferred Outflow of Resources due to Employer pension contribution made subsequent to 9/30/2019 but before 9/30/2020	TBD

2019	95,516	83,904	11,612	N/A	N/A
2020	94,996	TBD	TBD	N/A	N/A

Notes:

The Plan is not pay based. The members are volunteer firefighters.

Prior to October 1, 2016, Actual Contribution includes State contributions up to the base amount of \$85,547.

The City and membership agreed to use the accumulated excess premium tax revenue as of May 2016 to supplement funding of the Retirement System. The accumulated excess premium tax money was used to set up a Funding Standard Account (FSA) for the System. Future premium tax money received by the System will be allocated between a Share Plan for the membership and the FSA, based on the funded status of the System when the premium tax money is received. The credit balance in the FSA will be used to cover any contribution deficiencies from October 1, 2016 forward.

NOTES TO SCHEDULE OF CONTRIBUTIONS
GASB Statement No. 68

Valuation Date: October 1, 2019
Notes Actuarially determined contributions are calculated as of October 1, which is one year prior to the end of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar, Closed
Remaining Amortization Period	15 years
Asset Valuation Method	5-year smoothed market
Salary Increases	N/A
Investment Rate of Return	6.00%
Retirement Age	100% retirement one half year after reaching age 55 or age 50 with 20 years of service.
Mortality	RP-2000 mortality tables with blue collar adjustments and generational projections using scale BB as used by the Florida Retirement System for the Special Risk Class members in the July 1, 2018 actuarial valuation.

Other Information:

Notes See Discussion of Valuation Results in the October 1, 2019 Actuarial Valuation Report dated July 16, 2020.

**SENSITIVITY OF NET PENSION LIABILITY
TO THE SINGLE DISCOUNT RATE ASSUMPTION
GASB Statement No. 68**

A single discount rate of 6.00% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 6.00%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between the total actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (6.00%) was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan’s net pension liability, calculated using a single discount rate of 6.00%, as well as what the plan’s net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption

1% Decrease	Current Single Discount	1% Increase
5.00%	Rate Assumption	7.00%
6.00%	6.00%	7.00%
\$55,572	(\$132,906)	(\$289,789)
