- APPENDIX B: Traffic and Speed Data
- APPENDIX C: Data Analyses and Summary Figures

INTRODUCTION

The City of Wilton Manors retained Kimley-Horn and Associates, Inc. to assess traffic conditions within the Westside neighborhood generally bounded by N Andrews Avenue to the east, NW 9th Terrace to the west, NW 30th Court to the north, and the south fork of the Middle River to the south within the City of Wilton Manors. The objective of this study was to determine appropriate traffic calming treatments to enhance the quality of life of neighborhood residents. Traffic calming treatments aim to reduce cut-through traffic intrusion within the residential neighborhood, maintain acceptable vehicle speeds, and help achieve livability in the neighborhood. This report presents input from the neighborhood stakeholders (residents and community leaders) and City of Wilton Manors staff, field observations, traffic volume data, vehicle speed data, an analysis of existing traffic conditions including livability, speed, an analysis of historic crime data, and cut-through analyses, and proposed improvement plan. Figure 1 presents a map of the study area.

Traffic Calming Study

STAKEHOLDER INVOLVEMENT

A stakeholder kick-off meeting was held on February 15, 2022 at Wilton Manors City Hall located at 2020 Wilton Drive. The primary purpose of the meeting was to gather input from the neighborhood stakeholders regarding existing traffic and safety issues needed to guide traffic data collection and field observation efforts within the neighborhood. In general, the primary issues indicated by residents included speeding and traffic intrusion/cut-through traffic. Pertinent issues discussed include the following:

- Speeding along NW 30th Court west of SR 845/NW 9th Avenue
- Pedestrian safety concerns throughout neighborhood
 - Consideration of pedestrian demographics (School located in neighborhood)
- Cut-through traffic along NW 29th Street during the P.M. peak hour
- Traffic generated by local charter school
- Lighting conditions throughout neighborhood
- Safety conditions at the following intersections
 - NW 3rd Avenue and NW 24th Street
 - CR 811A/N Andrews Avenue and NW 25th Street
 - SR 845/NW 9th Avenue and NW 26th Street
- Identifying paths to Wilton Manors Elementary

Additionally, an online project website was developed using the Esri ArcGIS StoryMap platform to provide residents and stakeholders with background information related to the goals and objectives of the traffic calming study. The StoryMap included an overview of the project and descriptions of various traffic calming measures suitable for implementation in the study area. The online StoryMap was made available to the public starting February 15, 2022 through March 8, 2022. Google Analytics was used to track user activity on the project site and document the online traffic generated by the site. Between February 15, 2022 through March 8, 2022, 91 unique users accessed the StoryMap. Detailed meeting notes are contained in Appendix A.

DATA COLLECTION

Traffic data was collected on Tuesday, March 29, 2022 and Wednesday, April 13, 2022 at 30 locations within the Westside neighborhood to evaluate the existing traffic conditions. All traffic data was collected while school was in-session and included 24-hour directional traffic volume counts and speed data. The data collection locations and corresponding data collection dates are presented in Table 1. Note that data collection was not completed at three (3) of the identified locations due to repeated tampering of data collection equipment.

Table 1: 24-Hour Volume and Speed Count Locations	
Roadway Segment	Data Collection Date
NW 30 th Court west of SR 845/NW 9 th Avenue	Tuesday, March 29, 2022
NW 30 th Court east of SR 845/NW 9 th Avenue	Tuesday, March 29, 2022
NW 29 th Street between NW 7 th Avenue and SR 845/NW 9 th Avenue	Tuesday, March 29, 2022
NW 29 th Street between CR 811A/N Andrews Avenue and NW 3 rd Avenue	Tuesday, March 29, 2022
NW 7 th Avenue between NW 28 th Court and NW 29 th Street ⁽¹⁾	Wednesday, April 13, 2022
NW 3 rd Avenue between NW 28 th Street and NW 29 th Street	Tuesday, March 29, 2022

NW 28 th Street between NW 6 th Avenue and NW 7 th Avenue	Tuesday, March 29, 2022
NW 27 th Street between NW 6 th Avenue and NW 6 th Terrace	Tuesday, March 29, 2022
NW 7 th Avenue between NW 26 th Street and NW 27 th Street	Tuesday, March 29, 2022
NW 26 th Street between NW 8 th Avenue and SR 845/NW 9 th Avenue ⁽²⁾	Wednesday, April 13, 2022
NW 9 th Terrace between NW 9 th Lane and NW 26 th Court	Tuesday, March 29, 2022
NW 6 th Avenue between NW 25 th Street and NW 26 th Street	Wednesday, April 13, 2022
NW 7 th Avenue between NW 25 th Street and NW 26 th Street	Tuesday, March 29, 2022
NW 25 th Street between NW 6 th Avenue and NW 7 th Avenue	Tuesday, March 29, 2022
NW 25 th Street between NW 3 rd Avenue and NW 5 th Avenue	Tuesday, March 29, 2022
NW 5 th Avenue between NW 24 th Street and NW 25 th Street	Tuesday, March 29, 2022
NW 3 rd Avenue between NW 24 th Street and NW 25 th Street	Tuesday, March 29, 2022
NW 24 th Street between CR 811A/N Andrews Avenue and NW 3 rd Avenue	Tuesday, March 29, 2022
NW 24 th Street between NW 8 th Avenue and SR 845/NW 9 th Avenue	Wednesday, April 13, 2022
NW 7 th Avenue between NW 23 rd Street and NW 24 th Street	Tuesday, March 29, 2022
NW 6 th Terrace between NW 22 nd Court and NW 24 th Street ⁽³⁾	N/A
NW 23 rd Street between CR 811A/N Andrews Avenue and NW 2 nd Avenue	Tuesday, March 29, 2022
NW 5 th Avenue between NW 22 nd Street and NW 23 rd Street	Wednesday, April 13, 2022
NW 3 rd Avenue between NW 22 nd Street and NW 23 rd Street	Tuesday, March 29, 2022
NW 22 nd Street between NW 6 th Avenue and NW 7 th Avenue	Wednesday, April 13, 2022
NW 22 nd Street between CR 811A/N Andrews Avenue and NW 2 nd Avenue	Tuesday, March 29, 2022
NW 21 st Court between NW 3 rd Avenue and NW 5 th Avenue	Tuesday, March 29, 2022
NW 21 st Court between NW 2 nd Avenue and NW 3 rd Avenue	Tuesday, March 29, 2022
NW 20 th Street between CR 811A/N Andrews Avenue and NW 2 nd Avenue	Tuesday, March 29, 2022

Notes: (1) Only total volume data available. Speed data and volume split by direction is not available.

(2) Only bi-directional volume data available. Speed data is not available.

(3) No data was collected.

FIELD OBSERVATIONS

Weekday peak hour field reviews were performed in conjunction with traffic data analyses to assess overall traffic characteristics within the neighborhood. Field observations determined that there are several existing traffic calming devices throughout the neighborhood. A summary of the field observations is listed below.

Traffic Control Features and Roadway Characteristics:

- The posted speed limit in the study area is 25 MPH. Speed limit signs are posted at most entrances to the neighborhood.
- Continuous sidewalks are generally not present throughout the study area.
- Neighborhood roadways are generally narrow with some two-way roadway widths between 15 and 18 feet.
- Several speed humps and “No Thru Trucks” signs are present along NW 29th Street, which was the roadway with the highest collected volumes.
- A school zone is located within the study area along NW 29th Street west of CR 811A/N Andrews Avenue.

Traffic Flow Observations:

- NW 29th Street has the highest traffic volumes within the neighborhood. This observation was confirmed by the traffic count data.
- Delivery and landscaping vehicles park along neighborhood streets resulting in lane blockages.

Additionally, a nighttime field review was conducted to identify lighting conditions within the neighborhood. It was observed that lighting conditions are generally poor throughout the neighborhood and specifically at locations identified as areas with a higher concentration of crime.

TRAFFIC DATA ANALYSIS

The objective of the data analyses is to identify the need and locations for traffic calming improvements within the neighborhood. These improvements are determined by (i) determining if livability thresholds are exceeded, (ii) assessing the existing traffic conditions within the neighborhood and evaluating traffic patterns, and (iii) determining if speeding is excessive by evaluating the 85th percentile travel speeds within the neighborhood.

The FDOT peak season factor was applied to the collected data to adjust the traffic to peak season volumes. A peak season factor of 1.00 was applied to the collected data. A summary of the daily, A.M. peak hour, and P.M. peak hour traffic volumes is presented in Table 2. Detailed traffic data and the FDOT peak season factor category report are included in Appendix B.

Table 2: Summary of Peak Season Traffic Volumes					
Roadway Segment	Daily Traffic Volume	A.M. Peak Hour Beginning	A.M. Peak Volume	P.M. Peak Hour Beginning	P.M. Peak Volume
NW 30 th Court west of SR 845/NW 9 th Avenue	506	7:15	39	17:00	42
NW 30 th Court east of SR 845/NW 9 th Avenue	287	7:00	10	16:15	27

NW 21 st Court between NW 2 nd Avenue and NW 3 rd Avenue	692	8:15	62	16:30	60
NW 20 th Street between CR 811A/N Andrews Avenue and NW 2 nd Avenue	186	8:00	6	16:30	15

Notes: (1) Only total volume data available. Speed data and volume split by direction is not available.

(2) Only bi-directional volume data available. Speed data is not available.

(3) No data was collected.

Livability Analysis

The *City of Wilton Manors Traffic Calming Management Manual* provides guidelines for identifying excessive volumes on local streets. The purpose of the guidelines is to identify locations where traffic calming treatments should be considered. Table 3 summarizes the traffic volume thresholds defined by the City. Note that all study roadways with volume data collected are considered.

Traffic Flow (vehicles per day)	Environment
Below 500	Low Traffic Volumes
501 – 1,000	Low to Moderate Traffic Volumes
1,001 – 1,500	Moderate to High Traffic Volumes
Over 1,500	High Traffic Volumes

In order to consider the implementation of traffic calming devices, the location must meet certain minimum criteria established by the City. Among them, the daily volume, which is a livability indicator along a roadway, should exceed 1,000 vehicles per day. Based on the traffic volume criteria specified in the *City of Wilton Manors Traffic Calming Management Manual*, segments along NW 29th Street and NW 26th Street exceed local/residential roadway livability. Figure 2 depicts the segments exceeding livability thresholds.

Cut-Through Traffic Analysis

A review of collected daily volumes and the neighborhood roadway network was conducted to identify cut-through patterns. Additionally, cut-through traffic was observed during the field reviews. The objective of this analysis is to identify travel patterns throughout the day and likely routes used by cut-through traffic.

A summary of cut-through traffic analysis is presented in Table 3. Figure 3 depicts identified peak hour cut-through travel routes. Cut-through patterns were identified as follows:

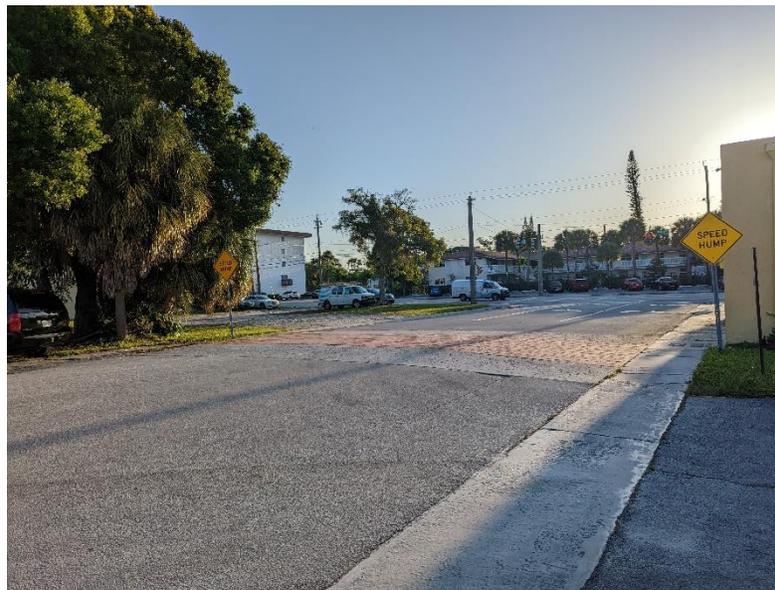

- Vehicles cut through NW 29th Street to travel between SR 845/NW 9th Avenue and CR 811A/N Andrews Avenue. This is likely because NW 29th Street provides a direct connection between the roadways. There are multiple traffic calming devices already installed on this roadway such as raised intersections and a signalized midblock crosswalk.
- Vehicles cut through the Westside neighborhood via a path along NW 25th Street, NW 7th Avenue, and NW 24th Street to travel between SR 845/NW 9th Avenue and CR 811A/N Andrews Avenue. This route may be used less frequently than NW 29th Street and may be used by drivers more familiar with the neighborhood to cut through while avoiding traffic along NW 29th Street.

Table 4: Traffic Volume Comparison to Livability Thresholds

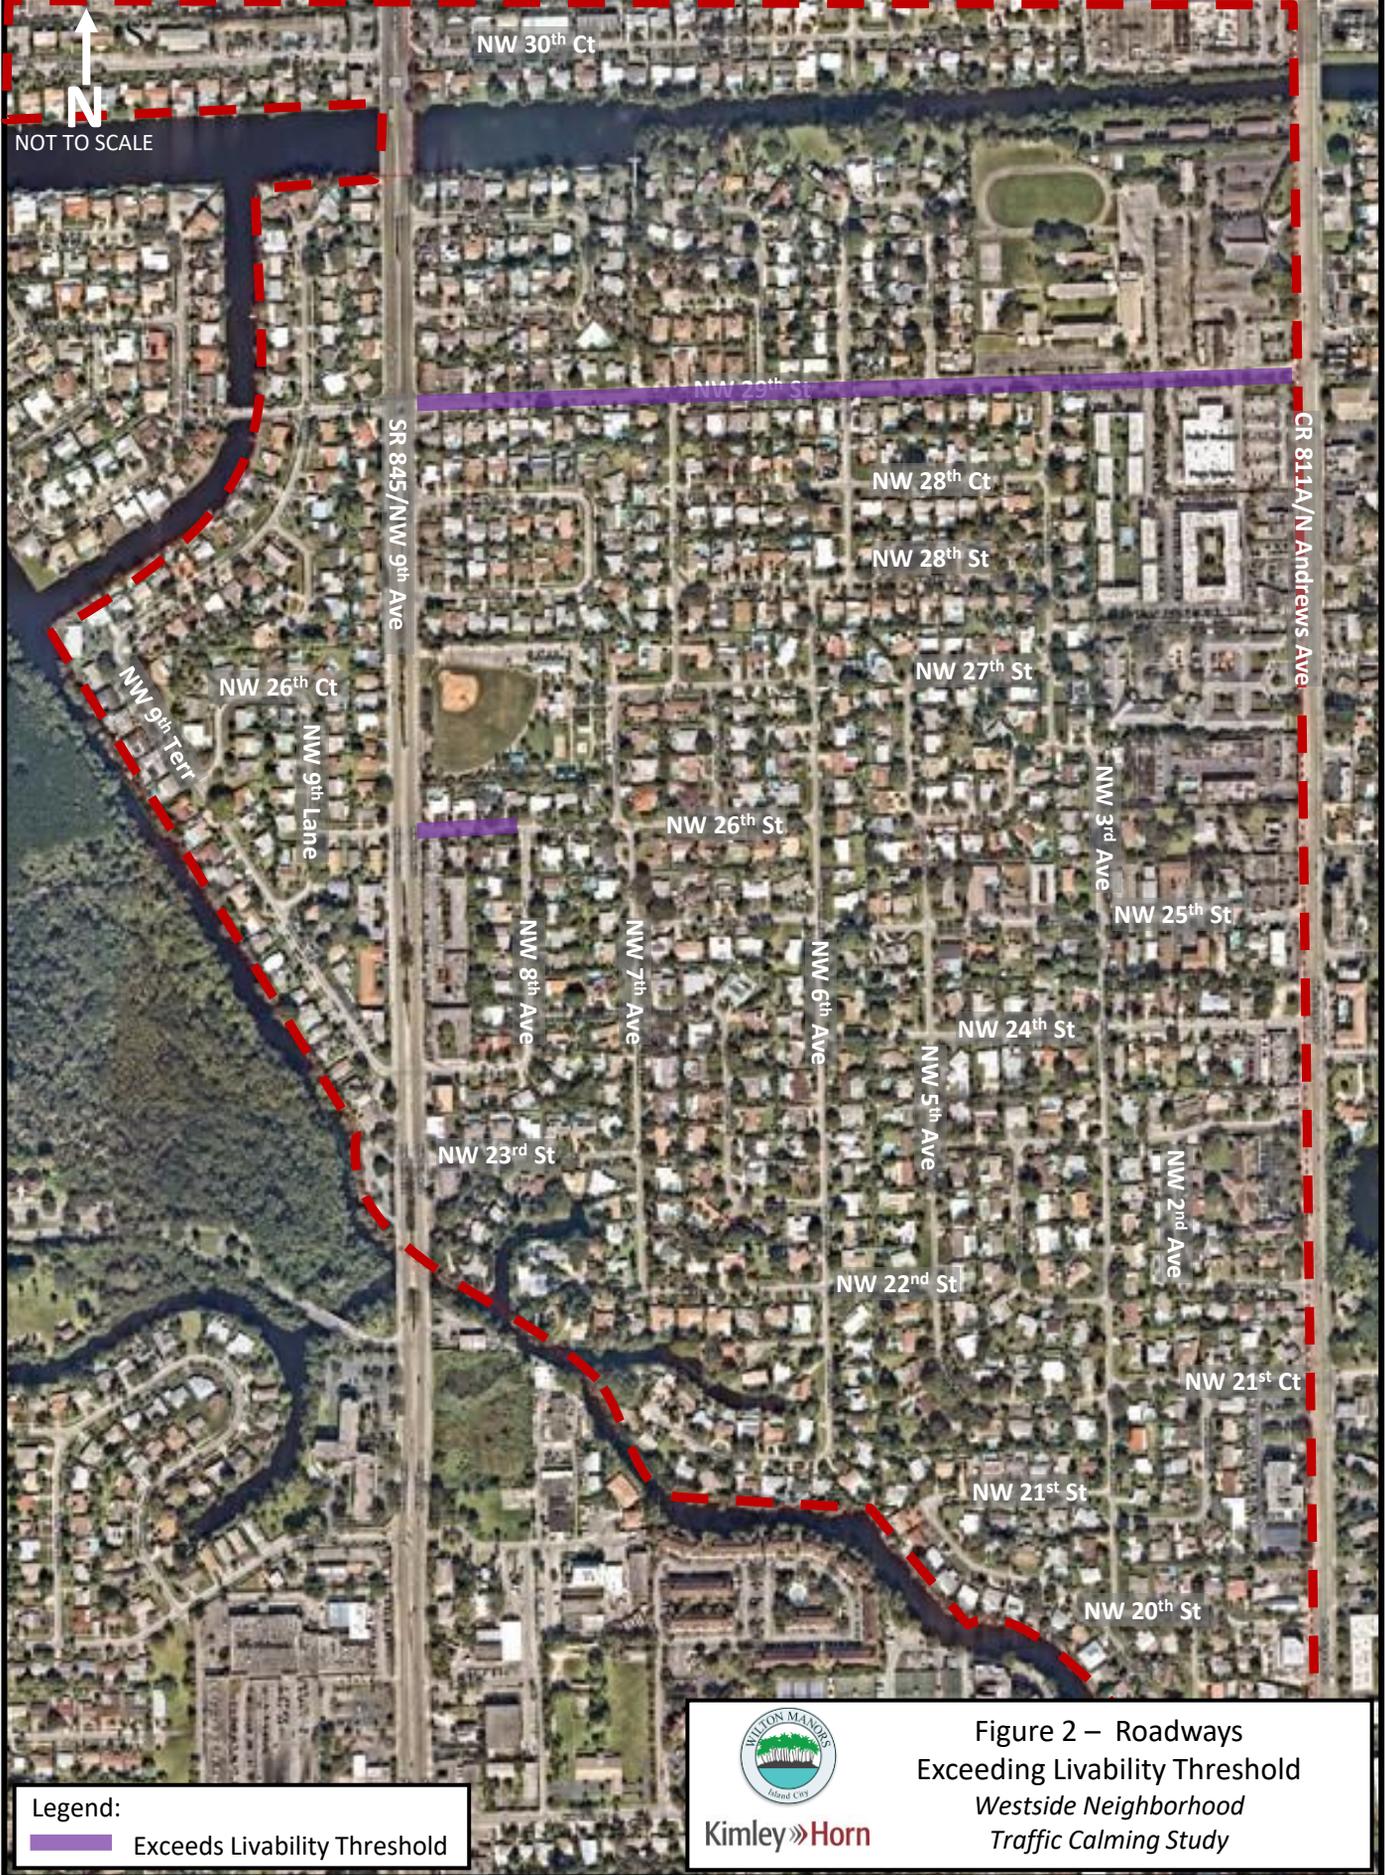

Roadway Segment	Roadway Type ⁽¹⁾	Peak Daily Volume	Peak Hour Two-Way Volume	Exceeds Livability Threshold? ⁽²⁾	Cut-Through Route?
NW 30 th Court west of SR 845/NW 9 th Avenue	Local/res.	506	42	No	No
NW 30 th Court east of SR 845/NW 9 th Avenue	Local/res.	287	28	No	No
NW 29 th Street between NW 7 th Avenue and SR 845/NW 9 th Avenue	Local/res.	4,361	437	Yes	Yes
NW 29 th Street between CR 811A/N Andrews Avenue and NW 3 rd Avenue	Local/res.	4,683	455	Yes	Yes
NW 7 th Avenue between NW 28 th Court and NW 29 th Street ⁽³⁾	Local/res.	480	47	No	No

Speed Analysis

The purpose of collecting speed data is to determine the magnitude of vehicle speeds within the neighborhood. The 85th percentile speed is often used as a measure of the upper limit of “reasonable” speeds for the prevailing conditions. The 85th percentile speed is the speed at which 85 percent (85%) of the vehicles are traveling at or below. The *City of Wilton Manors Traffic Calming Management Manual* provides guidelines for identifying excessive speeds on local streets. The purpose of the guidelines is to identify locations where traffic calming treatments should be considered. Table 5 summarizes the 85th percentile speed thresholds defined by the City.

Table 5: 85 th Percentile Speed Thresholds	
MPH Above Speed Limit	Concern
0 – 5	Minimal – Measures may not be necessary
6 – 10	Moderate – Measures should be considered
Over 11	Excessive – Measures should be taken

In order to consider the implementation of traffic calming devices, the location must meet certain minimum criteria established by the City. Among them, the 85th percentile speed should exceed the posted speed limit by six (6) MPH or more. The 85th percentile speed and posted speed limit within the neighborhood are summarized in Table 6.

An evaluation of the 85th percentile speeds demonstrates that some motorists travel faster than the posted speed limit. Figure 4 presents a summary of the 85th percentile speeds within the neighborhood. Based on the collected data, motorists travel more than six (6) MPH over the posted speed limit along NW 30th Court west of SR 845/NW 9th Avenue. Detailed speed data is contained in Appendix B.

Table 6: Summary of Speed Measurements (MPH)		
Roadway Segment	Posted Speed Limit	85 th Percentile Speed
NW 30 th Court west of SR 845/NW 9 th Avenue	25	31
NW 30 th Court east of SR 845/NW 9 th Avenue	25	24
NW 29 th Street between NW 7 th Avenue and SR 845/NW 9 th Avenue	25	30

 (2) Only bi-directional volume data available. Speed data is not available.
 (3) No data was collected.

Existing Traffic Calming Signage
 (Southbound NW 6th Avenue north of NW 30th Court)

Additionally, 85th percentile speeds were compared to 85th percentile speeds collected as part of the *City of Wilton Manors – Section 5 Traffic Calming Study, 2002*, at common data collection locations. This comparison was completed to determine the effect of the original traffic calming implementation plan on speeding within the Westside neighborhood. The 85th percentile speeds are summarized in Table 7. As seen in Table 7, the implementation of traffic calming devices such as speed humps and raised intersections successfully reduced 85th percentile speeds at common data collection locations.

Roadway Segment	2002 85 th Percentile Speed	2022 85 th Percentile Speed
NW 29 th Street between NW 7 th Avenue and SR 845/NW 9 th Avenue	34	30
NW 3 rd Avenue between NW 28 th Street and NW 29 th Street	27	20
NW 5 th Avenue between NW 24 th Street and NW 25 th Street	27	21
NW 3 rd Avenue between NW 24 th Street and NW 25 th Street	28	23
NW 24 th Street between CR 811A/N Andrews Avenue and NW 3 rd Avenue	23	24
NW 24 th Street between NW 8 th Avenue and SR 845/NW 9 th Avenue	26	18

Figure 4 – 85th Percentile Speeds

*Westside Neighborhood
Traffic Calming Study*

Crime Data Analysis

Historic crime data for the Westside neighborhood was provided by the Wilton Manors Police Department for the period between 2017 and 2021. The provided data was post-processed to highlight crimes involving thefts, burglaries, and robberies. A heat map of the crime data was developed using ArcGIS to identify patterns and hotspots in the data and is included as Figure 5. Crimes were more prevalent along the following roadway segments:

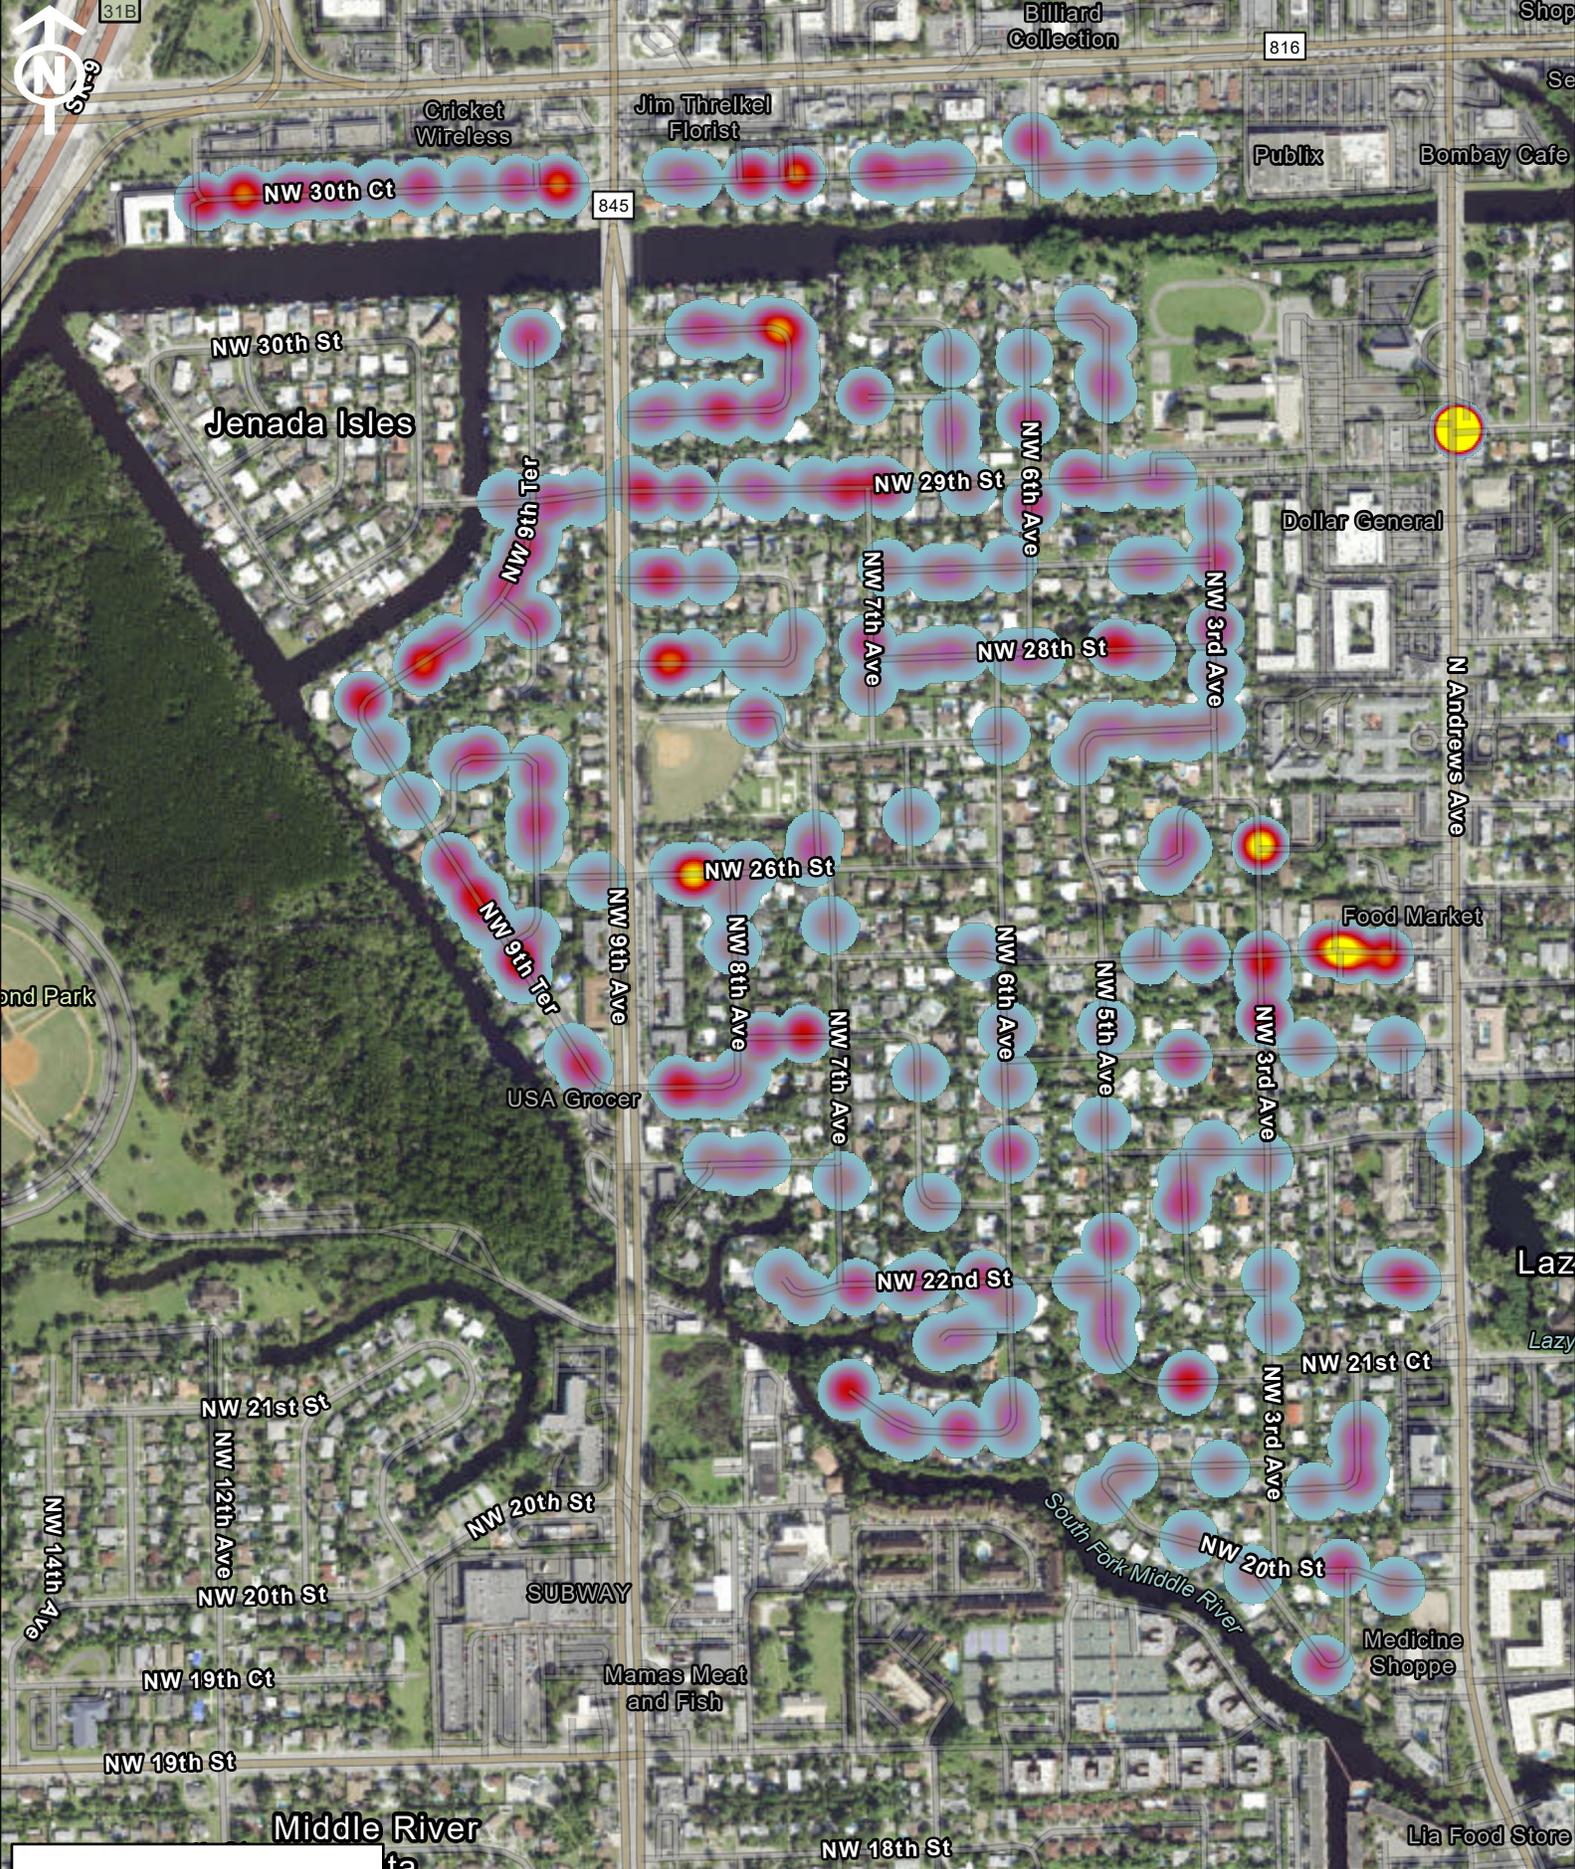

- NW 26th Street between NW 8th Avenue and SR 945/NW 9th Avenue
- NW 3rd Avenue between NW 26th Street and NW 27th Street
- NW 25th Street between CR 811A/N Andrews Avenue and NW 3rd Avenue

It is noted that crime locations were typically located closer to the boundary of the neighborhood. Additionally, poor lighting conditions at these locations may be a contributing factor.

Traffic Data Analysis Conclusions

It was determined that traffic calming improvements can be implemented within the Westside neighborhood as the traffic data demonstrated that NW 29th Street and NW 26th Street exceed livability thresholds established by the *City of Wilton Manors Traffic Calming Management Manual*.

Furthermore, cut-through travel patterns were identified within the neighborhood primarily using NW 29th Street, NW 25th Street, NW 7th Avenue, and NW 24th Street. The 85th percentile speeds demonstrates that motorists travel six (6) MPH or greater than the posted speed limit along NW 30th Court west of SR 845/NW 9th Avenue. The collected crime data indicate that crime locations were typically located closer to the boundary of the neighborhood along NW 26th Street, NW 3rd Avenue, and NW 25th Street. Data analyses and summary figures are included in Appendix C.

 Traffic Calming Study

TRAFFIC CALMING IMPROVEMENT PLAN

An improvement plan was prepared based on the analysis of traffic data, field observations, and concerns raised by residents and stakeholders. The development of the improvement plan was an iterative process and involved continuous coordination with City staff. Improvements considered for the neighborhood streets include various traffic calming treatments and roadway improvements. A description of potential traffic calming strategies is presented below.

Traffic Calming Treatments

In response to traffic concerns identified through an analysis of traffic data, conceptual traffic calming treatment options were examined for the neighborhood. The strategies focused on traffic calming measures influencing travel speeds through redesigning geometric elements of streets, to encourage slower traffic speeds, thereby reducing the timesaving benefit of using the neighborhood roadways as a cut-through and enhancing safety for pedestrians and bicyclists and improving quality of life. The selection of traffic calming measures is dependent upon the type of traffic concern identified at a specific location and requires location-by-location analysis.

Effective traffic calming should also incorporate enhancements to the streetscape. This includes design and landscape features that improve the aesthetics and livability of a neighborhood while increasing the effectiveness of many of the traffic calming devices. Common measures used to implement traffic calming strategies include speed tables, raised intersections, and textured pavement/brick paver intersections. These measures are discussed in more detail within this section.

Speed Tables

Speed tables are elongated speed humps with a flat top section. Speed tables are typically long enough for an entire wheelbase of a passenger vehicle to rest on top. Brick pavers or other textured materials can be included to improve the aesthetics of the speed table. A concern of speed tables is that noise levels may increase as a result of the vertical element of this traffic calming treatment. However, several studies indicate that lower speeds as a result of this treatment tend to lower noise levels. Speed tables typically are 22 feet in length, with a maximum height of five (5) inches. The flat table portion of the speed table is 10 feet in length with six (6) foot approaches. Speed tables should be spaced approximately 300 to 600 feet apart.

Raised Intersections

Raised intersections are raised plateaus that extend through the length of an intersection. Inclines are provided on approaches to ramp up on to the raised portion of the intersection. The entire intersection is elevated by approximately three (3) to five (5) inches or the elevation of the adjacent sidewalk. Pedestrian crosswalks are also elevated as part of this treatment. The intersection ramps are usually made of concrete but may be constructed using pavers or asphalt.

Textured Pavement/Brick Pavers

Textured pavement/brick pavers encourage motorists to be aware that they are in a residential area where speeds are lower by causing vibration, and more noticeable motion of the vehicle. Textured pavement/brick pavers are also used to emphasize pedestrian crossing activity and to indicate to motorists that lower speeds are intended.

Neighborhood Gateway Features/Signage

Gateway features are often provided at entrances to neighborhoods to alert motorists that they are entering a residential neighborhood. Gateway features may be enhanced with beautification features such as lush landscaping, lighting, and wayfinding/signage and may also be supplemented with *Manual on Uniform Traffic Control Devices (MUTCD)* compliant R11-4 signs displaying “ROAD CLOSED TO THRU TRAFFIC”.

Proposed Traffic Calming Improvement Plans

The proposed traffic calming improvement plan is depicted in Figure 6. Note that the proposed plan includes enhancements to the current network of traffic calming devices to further discourage cut-through traffic along both identified and potential cut-through routes. Specific traffic calming devices are also recommended adjacent to high pedestrian generators to improve pedestrian safety in those areas.

Additional Recommendations

Other recommendations include trimming hedges and installing convex mirrors to improve visibility at obscured corners and replacing standard stop signs with flashing LED stop signs at locations with complaints of infractions. Additionally, a lighting study is recommended to identify additional lighting improvements to discourage future crime in the area.

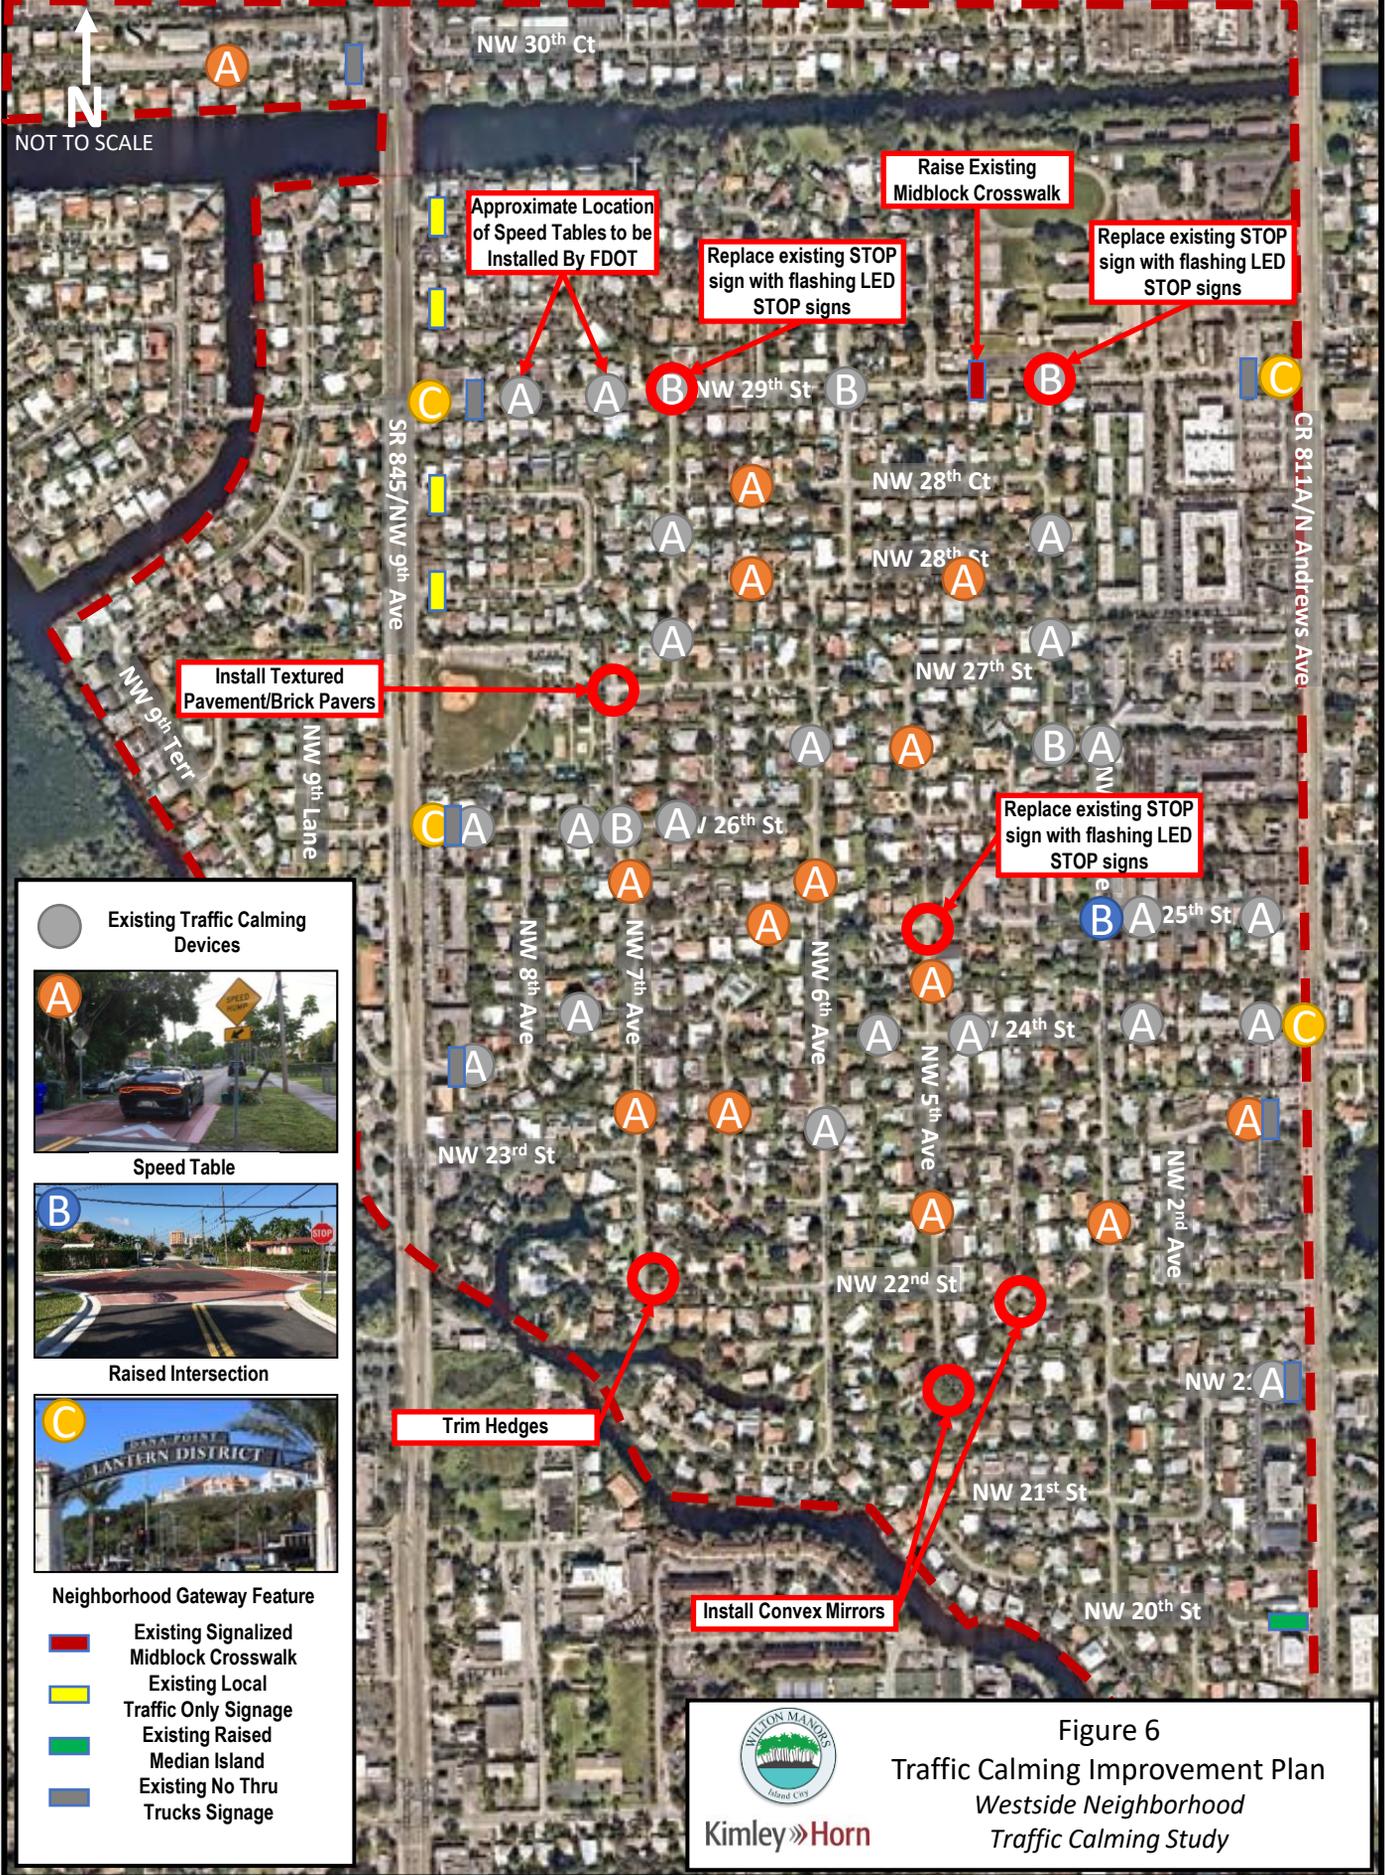

Figure 6
 Traffic Calming Improvement Plan
 Westside Neighborhood
 Traffic Calming Study

CONCLUSIONS AND RECOMMENDATIONS

The objective of this study was to assess traffic conditions within the Westside neighborhood generally bounded by N Andrews Avenue to the east, NW 9th Terrace to the west, NW 30th Court to the north, and the south fork of the Middle River to the south within the City of Wilton Manors and to determine if improvements are necessary to reduce negative effects of traffic, alter driver behavior, and improve safety.

The analysis of traffic data for the neighborhood demonstrated that two (2) neighborhood roadways exceed livability thresholds established by the *City of Wilton Manors Traffic Calming Management Manual*. A detailed analysis of traffic volumes identified cut-through patterns within the neighborhood. Cut-through traffic primarily traveled along NW 29th Street and via a path along NW 25th Street, NW 7th Avenue, and NW 24th Street to travel between SR 845/NW 9th Avenue and CR 811A/N Andrews Avenue. The 85th percentile vehicle speed data concluded that some motorists travel six (6) MPH or greater than the posted speed limit along NW 30th Court west of SR 845/NW 9th Avenue. Finally, the collected crime data indicated that crime locations were typically located closer to the boundary of the neighborhood along NW 26th Street, NW 3rd Avenue, and NW 25th Street.

Traffic calming treatments were identified to reduce traffic volumes and speeds along local residential roadways by reducing the timesaving benefit of using the neighborhood roadways as a cut-through. Additionally, specific traffic calming devices are recommended adjacent to high pedestrian generators to improve pedestrian safety in those areas. These improvements include speed tables, raised intersections, neighborhood gateway features, raised crosswalks, vegetation trimming, and textured pavement/brick pavers. Additionally, a lighting study is recommended to identify additional lighting improvements to discourage future crime in the neighborhood.

Appendix A

Stakeholder Kick-Off Meeting Notes

Stakeholder Meeting Notes

ID	What is your connection to the Westside Neighborhood?	Recommendation Type	Recommendation Description
2	#N/A	Visibility Issue	
3	Full-Time Resident	Excessive Traffic	Sidewalks are not addressed
4	Full-Time Resident	Other	close off street entrance or put up No-Thru Traffic
5	Full-Time Resident	Traffic Calming Device Needed	traffic calming - speed bump
6	Full-Time Resident	Vehicles Cut-Through Neighborhood	No-Thru traffic signage
7	Full-Time Resident	Traffic Calming Device Needed	speed bump - blind curve signage
8	Full-Time Resident	Vehicles Cut-Through Neighborhood	close off street completely
9	Full-Time Resident	Difficult to Cross Street or Intersection	pedestrian crosswalk
10	Full-Time Resident	Traffic Calming Device Needed	round-a-bout or other traffic calming
11	Full-Time Resident	Vehicles Cut-Through Neighborhood	No-Thru Traffic signs
12	Full-Time Resident	Vehicles Cut-Through Neighborhood	close off street
13	Full-Time Resident	Vehicles Cut-Through Neighborhood	close off street - or No-Thru traffic signs
14	Full-Time Resident	Traffic Signal Needed	traffic signal - crosswalk
15	Visitor	Visibility Issue	Test
16	Full-Time Resident	Vehicles Cut-Through Neighborhood	4-way STOP sign at intersection
17	Full-Time Resident	Traffic Signal Needed	across from park. regulates traffic on 29th Street.
18	Full-Time Resident	Traffic Signal Needed	remove NW 4th Ave traffic light, replace at NW 3 Ave.
19	Full-Time Resident	Traffic Signal Needed	26 major route for residents entering, leaving neighborhood. Enables left turn
20	#N/A	Other	NW 28 Ct. one way east, exit right only on NW 28 Street
21	Full-Time Resident	Traffic Calming Device Needed	raised intersection
22	Full-Time Resident	Vehicles Cut-Through Neighborhood	NW 25th Street from Andrews to 7th Avenue to Nw26th street to Powerline Rd is a major cut through. I predict over 90% of the traffic is cut through traffic. On top of cut through traffic speeds become very excessive especially on NW 25th between 6th and 7th ave. There are no speed humps in this stretch and speeds are very high. This is issue is continuous but much worse during rush hours.
23	Full-Time Resident	Difficult to Cross Street or Intersection	A crosswalk over Powerline Rd (with a HAWK) should be placed directly adjacent to the pedestrian opening at Mickel Park.
24	Full-Time Resident	Unsafe Driving Conditions	Put a mini roundabout outside the entrance of Mickel Park, at the cross between NW 27th St and NW 7th Ave. It is very dangerous at this location
25	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
26	Full-Time Resident	Traffic Calming Device Needed	Mini Roundabout
27	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
28	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
29	Full-Time Resident	Unsafe Driving Conditions	traffic circle
30	Full-Time Resident	Difficult to Cross Street or Intersection	raised crosswalks / median refuge
31	Full-Time Resident	Traffic Calming Device Needed	convert to traffic circle
32	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
33	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
34	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
35	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
36	Full-Time Resident	Traffic Calming Device Needed	mini roundabout
37	Full-Time Resident	Pedestrian Concerns	mini roundabout
38	Full-Time Resident	Traffic Calming Device Needed	round about
39	Full-Time Resident	Difficult to Cross Street or Intersection	raised crosswalk
40	#N/A	Difficult to Cross Street or Intersection	High traffic area no left turn but everyone does it.. needs divider
41	Full-Time Resident	Difficult to Cross Street or Intersection	turning lane not marked properly, people hitting the curb who think its a left turn onto OPB
42	#N/A	Other	Close off Street to traffic for safety
43	#N/A	Speeding Issues	This is a long straight stretch on NW 9th Terrace that allows drivers to increase speeds that are excessive for a neighborhood. There needs to be bumps along the path that will prevent motorist from obtaining an excessive speed

Stakeholder Meeting Notes

ID	What is your connection to the Westside Neighborhood?	Recommendation Type	Recommendation Description
			Drivers frequently run the red light traveling Powerline north and south. There is nothing to slow speeders down and they run the light. I personally have had two near misses where I would have been impacted by a motorist running a red light. Motorists turning south onto Powerline road from NW 29th St do not yield to motorist traveling east out of Jenada Isles/Villas. Motorists turning left onto Powerline going south do not yield to pedestrians using cross walk. Residents traveling west on NW 29th St who stop at the intersection of Powerline and NW 29th St are road raged as we are cut through traffic who are turning right to go to OPB. The traffic signal at NW 29th ST and Powerline can be a very long wait at certain times in changing from red to green creating some to cut past stopped traffic and other to run red traffic signal
44	Full-Time Resident	Aggressive Drivers	
45	Full-Time Resident	Speeding Issues	Speeding bump at NW 26th St and NW 9th Terrace needed to for reduction of speed
46	Full-Time Resident	Aggressive Drivers	Enforcement to prevent all off road type motor vehicles from using this road. This is prevalent most weekends on Sunday.
47	Full-Time Resident	Difficult to Cross Street or Intersection	Walkers and bikers are challenged to cross Powerline because of excessive speeding and volume of traffic
48	Full-Time Resident	Difficult to Cross Street or Intersection	Walker and bikers unable to safely cross Powerline because of motorist speed and traffic volume
49	Full-Time Resident	Vehicles Cut-Through Neighborhood	Implement a strategy to stop the large number of cut through traffic between NW 25th Street at Andrews to 7th ave to NW 26th Street and Powerline. In to of the large number of cut through traffic extremely high speeds are occurring especially on NW 25th between 6th and 7th avenue which has nothing to calm traffic
50	Full-Time Resident	Vehicles Cut-Through Neighborhood	Reroute traffic off of NW 25th Street or traffic calming device
51	Full-Time Resident	Traffic Calming Device Needed	Raised intersection
52	Full-Time Resident	Traffic Calming Device Needed	Blind curve area. Walkers, bikers use this road
53	Full-Time Resident	Signage or Pavement Markings Needed	NW 25th Street is right turn only onto Andrews Ave. Cars very often turn left. Can a center curb be added to make it more difficult for cars to illegally turn left?
54	Full-Time Resident	Vehicles Cut-Through Neighborhood	Add a stop signs on 7th Ave. at NW 25th Street
55	Full-Time Resident	Vehicles Cut-Through Neighborhood	Add a stop sign on NW 24th Street at 5th Ave. It will make it a 4 way stop.
56	Full-Time Resident	Traffic Signal Needed	coordinate traffic light with 26 Street light, remove traffic light from 24 Street intersection.
57	Full-Time Resident	Vehicles Cut-Through Neighborhood	There is one speed bump; a second speed bump further down the street would be great. In addition, the light at corner of Andrews and 21 Ct should be longer. Cars on Andrew routinely go through a red signal. It is difficult to cross the street on car and on foot at certain hours of the day.
58	Full-Time Resident	Difficult to Cross Street or Intersection	The light at corner of Andrews and 21 Ct should be longer. Cars on Andrew routinely go through a red signal. It is difficult to cross the street on car and on foot at certain hours of the day.
59	Full-Time Resident	Visibility Issue	this is a blind curve and cars drive by above the speed limit
60	Full-Time Resident	Aggressive Drivers	I recently had a driver pass my car at this curve
61	Full-Time Resident	Unsafe Driving Conditions	blind curve and excessive speed
62	#N/A	Pedestrian Concerns	Cars speed thru while pedestrians on street. This area needs 2 speed humps to slow traffic on either side of the curve (21st Ct & 5th Ave)
63	Full-Time Resident	Aggressive Drivers	Need speed calming measures
64	Full-Time Resident	Pedestrian Concerns	Sidewalks needed on this busy street
65	Full-Time Resident	Vehicles Cut-Through Neighborhood	Make it very difficult for non-residents to use NW 25th street as a cut through to Powerline
66	Full-Time Resident	Traffic Calming Device Needed	There are no "speed Bumps on NW 25th street after the first block between Andrews and NW 3rd Avenue. Traffic needs to be slowed down. Tons of people walking dogs, as well as many of us getting exercise
67	Full-Time Resident	Speeding Issues	Speed calming needs to be placed on each street between NW 3rd Avenue and NW 7th Avenue on NW 25th Street
68	#N/A	Speeding Issues	Traffic moving ag excessive speeds. Often running red light
69	Full-Time Resident	Aggressive Drivers	More visible stop light
70	Full-Time Resident	Traffic Signal Needed	There needs to be a traffic signal at the corner of NW25th Street that coordinates with the signal on NW 26th street. This is a very dangerous intersection.

Stakeholder Meeting Notes

ID	What is your connection to the Westside Neighborhood?	Recommendation Type	Recommendation Description
71	Full-Time Resident	Speeding Issues	Raised intersection in addition to stop sign. Most drivers barely slow down at the corner and many don't slow at all and blow through the existing stop sign.
72	Full-Time Resident	Traffic Calming Device Needed	Excessive speed in the blind curve
73	Full-Time Resident	Excessive Traffic	Enforce Do Not Block Intersection signs
74	Full-Time Resident	Speeding Issues	Speed Humps
75	Full-Time Resident	Speeding Issues	Step up police enforcement
76	Full-Time Resident	Speeding Issues	Speed Humps
77	Full-Time Resident	Signage or Pavement Markings Needed	Add diagonal striping (Don't Block The Box) to keep intersections clear at rush times
78	Full-Time Resident	Speeding Issues	speed humps
79	Full-Time Resident	Signage or Pavement Markings Needed	Add diagonal striping to reduce blocking of intersection at rush times
80	Full-Time Resident	Signage or Pavement Markings Needed	All street lines have faded
81	Full-Time Resident	Signage or Pavement Markings Needed	Prohibit U-turns from southbound lanes - direct U-turns to NW 29th St traffic light
82	Full-Time Resident	Unsafe Driving Conditions	Concrete Raised Curb For No Reason
83	Full-Time Resident	Speeding Issues	ENFORCEMENT!
84	Full-Time Resident	Difficult to Cross Street or Intersection	Full Crosswalk Needed
85	Full-Time Resident	Difficult to Cross Street or Intersection	Need FULL crosswalks
86	Full-Time Resident	Speeding Issues	ENFORCEMENT!
87	Full-Time Resident	Speeding Issues	Lower Speed Limit to 35mph
88	Full-Time Resident	Difficult to Cross Street or Intersection	Full Crosswalk
89	Full-Time Resident	Aggressive Drivers	Better Street Design
90	Full-Time Resident	Pedestrian Concerns	Better CrossWalk and Markings Needed!
91	Full-Time Resident	Pedestrian Concerns	Add Cross Walk
92	Full-Time Resident	Pedestrian Concerns	Add Crosswalk
93	Full-Time Resident	Pedestrian Concerns	Better Cross Walk Needed
94	Full-Time Resident	Pedestrian Concerns	Cross Walk Desperately Needed
95	Full-Time Resident	Signage or Pavement Markings Needed	Stop signs northbound as many take corner at quick speed
96	Full-Time Resident	Signage or Pavement Markings Needed	Stop sign exiting Mikel Park (heading east)
97	Full-Time Resident	Traffic Calming Device Needed	Slow traffic using the street as a pass through
98	Full-Time Resident	Traffic Calming Device Needed	Slow traffic using the street as a pass through
99	Full-Time Resident	Traffic Calming Device Needed	Slow traffic using the street as a pass through, sometimes speeds 5 - 10 over speed limit
100	Full-Time Resident	Traffic Calming Device Needed	Northbound turning east take corner too sharp leaving indentation between road and swale; curb to turn traffic a bit west
101	Full-Time Resident	Traffic Calming Device Needed	Round About
102	Full-Time Resident	Other	One way street on NW29th and NW25/6thAve/NW26th with traffic calming (intensive) and full time traffic signals at either end. This will provide a pass that would help relieve Andrews and OPB.
103	Full-Time Resident	Other	One way street
104	Full-Time Resident	Other	One way street
105	Full-Time Resident	Other	One way street
106	Full-Time Resident	Other	One way street
107	Full-Time Resident	Vehicles Cut-Through Neighborhood	it seems no one stops at the stop signs, some sort of detail or periodic sting operations may help
108	Full-Time Resident	Traffic Signal Needed	busy intersection with no pedestrian crossing - 2 blocks from school
109	Full-Time Resident	Difficult to Cross Street or Intersection	pedestrian light needed
110		Traffic Calming Device Needed	speed hump
111		Traffic Calming Device Needed	speed humps
112		Traffic Calming Device Needed	speed humps
113		Pedestrian Concerns	
114		Pedestrian Concerns	Needs better painted cross walk
115		Pedestrian Concerns	Needs better painted crosswalk
116		Pedestrian Concerns	

Stakeholder Meeting Notes

ID	What is your connection to the Westside Neighborhood?	Recommendation Type	Recommendation Description
117		Traffic Calming Device Needed	slow down for kids coming and going from park
118		Traffic Calming Device Needed	slow down traffic for kids coming and going from park
